

**Information on tariff and multipliers of
Open Grid Europe GmbH
for the yearly product of the gas year 2022/2023**

Essen, 02 June 2022

The English translation of this information is nonbinding and for convenience only.

It may not be used for interpretation of the binding German version,
published on the website of Open Grid Europe GmbH:

<https://www.oge.net>

The tariff for the yearly product for firm freely allocable capacities shown on the capacity platform of PRISMA Capacity Exchange GmbH (PRISMA) for the gas year 2022/2023 is a weighted tariff rounded to 2 digits after the decimal point and is calculated as follows:

$$\left(\frac{\text{Yearly demand charge 2022}}{365}\right) \times \text{No. of days Q4 2022} + \left(\frac{\text{Yearly demand charge 2023}}{365}\right) \times \text{No. of days Q1 – Q3 2023}$$

whereas:

Number of days in Q4 2022 = 92

Number of days in Q1 – Q3 2023 = 273

The yearly demand charge for the last quarter of 2022, expressed in €/kWh/h/a, can be found in the below mentioned Price Sheet for 2022, the yearly demand charge for the first three quarters of 2023, expressed in €/kWh/h/a, in the below mentioned Price Schemes for 2023.

The individual multiplier for interruptible capacities (multiplier ic) shown on PRISMA is calculated as follows:

$$\frac{(\text{multiplier ic 2022} \times \text{No. of days Q4 2022}) + (\text{multiplier ic 2023} \times \text{No. of days Q1 – Q3 2023})}{365}$$

whereas:

Number of days in Q4 2022 = 92

Number of days in Q1 – Q3 2023 = 273

The individual multipliers for interruptible capacities can be found in the below mentioned Price Sheet for 2022 respectively Price Schemes for 2023.

The multiplier for storage facilities (multiplier st) shown on PRISMA is calculated as follows:

$$\frac{(\text{multiplier st 2022} \times \text{No. of days Q4 2022}) + (\text{multiplier st 2023} \times \text{No. of days Q1 – Q3 2023})}{365}$$

whereas:

Number of days in Q4 2022 = 92

Number of days in Q1 – Q3 2023 = 273

The multipliers for storage facilities can be found in the below mentioned Price Sheet for 2022 respectively Price Schemes for 2023.

Due to rounding differences, the published tariff on PRISMA can slightly differ from the invoiced tariff. The monthly invoice amount will be based on the tariff valid for the respective month.

In addition to that the following conditions are relevant for

- the last quarter of 2022:
 - Price Sheet of Open Grid Europe GmbH for entry and exit contracts as well as internal orders in accordance with Cooperation Agreement XII in the Trading Hub Europe GmbH market area (23 September 2021), Valid for gas shipments from 1 January 2022
- and the first three quarters of 2023:
 - Price Scheme for interconnection points according to Regulation (EU) 2017/459 in the Trading Hub Europe GmbH market area (02 June 2022), Valid from 1 January 2023, 06:00 a.m., until 1 January 2024, 06:00 a.m.
 - Price Scheme for storage facilities in the Trading Hub Europe GmbH market area (02 June 2022), Valid from 1 January 2023, 06:00 a.m., until 1 January 2024, 06:00 a.m.
