

Market Information regarding the implementation of VIP as of 1 March 2019

The following points will change with the implementation of VIP from 1 March 2019:

1. Capacity

1.1 Marketing of capacity

- The involved TSOs will offer capacities at the VIPs for the first time in the day-ahead capacity auction on 28 February 2019.
- Nominations for monthly capacities in March booked in February will be allocated to IP
- No more capacities will be marketed at the IPs Medelsheim, Waidhaus and Oberkappel after 1 March 2019.
- The further capacity marketing will be conducted in accordance with the EN-TSOG auction calendar.
- Interruptible day-ahead capacity at the VIP will be offered even if firm capacity for the following day is not sold out.

1.2 DZK (DAC) Product at VIP

It will be only possible to book and nominate the VIP DZK (DAC) product with a separate DAC Balancing account. In order to create this DAC Balancing account, please contact NetConnect Germany.

2. Change of nomination and operative processes

2.1 Nomination for IPs and VIPs

From 1 March 2019, nominations have to be sent separately to IP or VIP (with indication of the EIC code or location code).

Nominations for existing contracts will have to be sent to the IP until the contracts expire. Nominations for new contracts will only be received at the VIP.

2.2 Change of the shipper codes

From 1 March 2019, the nomination has to be made with your balancing code instead of our MG-codes for all networks points (IP & VIP)

| Nomination format | External SC | Internal SC |
|--------------------------|-------------|-------------|
| Now | xxxxyy | MGxxyy |
| Starting gas day 1 March | xxxxyy | NCHBxxyy |

- Please use the MG-codes as internal shippercode for gas day 28.02.
- Please start using the NCHB-codes as internal shipper code for gas day 01.03.

2.3 Matching

Matching will be performed at the VIP for the **VIP and subordinated IPs** by the respective operating TSO.

In case of a mismatch the value will be divided pro rata to the VIP and subordinated IP according to the existing nominations.

2.4 Information about Interruption

In case of nomination interruptions OGE customers will be informed directly via market message.

2.5 Overview of nomination codes

| Network point | Operator | EIC | L-Code |
|----------------------|----------|------------------|----------|
| IP Medelsheim | OGE | 21Z000000000039S | L1000955 |
| VIP France - Germany | GRTD | 21Z0000000004928 | L2001605 |
| IP Waidhaus | OGE | 21Z0000000000236 | L1000488 |
| VIP NCG Waidhaus | OGE | 21Z000000000489Y | L2001606 |
| IP Oberkappel | OGE | 21Z000000000001G | L1000950 |
| VIP NCG Oberkappel | OGE | 21Z000000000490C | L2001607 |
