

Publication of network areas with a higher probability of a market area change

Date: 31.10.2019

As of October 31 of each year, transmission system network operators are obligated to publish the network areas for which a higher probability of a market area change or adjustment exists (Sec. 5 (7) of the Cooperation Agreement).

This could apply to the following network area:

- Oberhessengas Netz GmbH
- Stadtwerke Lengerich GmbH

The publication covers network areas for which a higher probability of a market area change or adjustment exists by 2022. Due to the amendment of the GasNZV, the two German market areas will be merged by April 2022 at the latest.

In the case of new material findings, the situation will be updated independently of the deadline mentioned.
