Presse Release

28 May 2020

OGE publishes network tariffs for NetConnect Germany and GASPOOL market areas effective 1 January 2021

Uniform postage stamp tariffs for the NetConnect Germany and GASPOOL market areas from 1 January to 1 October 2021

On 28 May 2020, Open Grid Europe (OGE) published its network tariffs applicable from 1 January 2021. The new annual tariff for a firm freely allocable entry and exit capacity will be € 3,77 / (kWh/h) / a in the NetConnect Germany (NCG) market area and € 3,32 / (kWh/h) / a in the GASPOOL market area.

Compared to 2020, the new tariff corresponds to a reduction of around 7,4 % in the NCG market area and a reduction of around 1,2 % in the GASPOOL market area for firm freely allocable entry and exit capacities booked with OGE.

In contrast to previous years, the tariffs will only apply from 1 January 2021 to 1 October 2021. From 1 October 2021, there will be a uniform tariff for the new joint Trading Hub Europe (THE) market area. The Federal Network Agency (BNetzA) has already initiated a process under the name REGENT 2021 to determine the tariffs. OGE is expected to publish the tariff valid from 1 October 2021 at the end of September 2020, depending on the Federal Network Agency's decisions.

About OGE

OGE is one of Europe's leading gas transmission system operators. With our pipeline network spanning approximately 12,000 kilometres, we transport gas throughout Germany. Our geographic location makes us the central link for gas flows across the European single market. 1,450 OGE employees ensure security of supply. We make our network available to all market participants in a transparent and non-discriminatory way in line with market needs. We enable energy supply. Today and in the energy mix of the future.
