In touch with technology

Germany's leading gas transmission system operator presents itself at vocational training fair in Essen

The heart of Germany's largest gas transmission system beats in Essen. The city on the Ruhr is home to Open Grid Europe, formerly E.ON Gastransport. At the Apprentice and Student Days 2010 in Essen from 12 to 13 November, the company will present itself for the first time in its new look to the next generation of potential employees.

Be it commercial or technical professions, Open Grid Europe offers vocational training in a broad range of jobs from industrial clerk, media designer and chemical laboratory assistant to technical professions such as industrial mechanic and electronics technician. There are many opportunities for both the technically and the commercially minded. Students can also combine their vocational training at Open Grid Europe with a degree course e.g. at Hochschule für Ökonomie und Management (FOM) in Essen.

"Open Grid Europe provides sound training for young people to lay the foundation for their future career. And being committed and achieving top grades will even allow trainees to reduce the length of their training period," said Wolfgang Anthes, Managing Director in charge of Human Resources at the company.

On both days of the fair, company officials will be available from 9 a.m. to 4 p.m. for face-to-face meetings at stand 137 in hall 1A (Messe Essen, Norbertstrasse, 45131 Essen).

Open Grid Europe GmbH

Open Grid Europe, a subsidiary of E.ON Ruhrgas AG based in Essen, is Germany's leading gas transmission company. With its ultra-modern, efficient system of approx. 12,000 km of pipeline and comprehensive technical services, Open Grid Europe offers and arranges innovative, forward-looking transportation solutions for natural gas and biogas. Further company details can be found at www.open-grid-europe.com.
